

AIG - AI LITERACY

AIG 2001 AI Literacy: Responsible and Informed Use (2 Units)

This course provides an introduction to foundational concepts of generative AI and explores the critical ethical, legal, and practical considerations for their responsible and effective use.

Letter grade.

AIG 2002 AI Literacy: Prompt Craft and Applied Automation (2 Units)

This course provides an introduction to foundational concepts of generative AI and provides practical application of advanced prompting skills and technical understanding of LLM mechanics and capability.

Letter grade.

AIG 2003 AI Literacy: Designing AI Solutions (2 Units)

This course provides an opportunity to design and AI solution. Students will consider all aspects of ethics, safety, and integrity to make decisions about when and where a specified process or project tasks can be improved by using AI. Students will demonstrate the use of AI using selected AI platforms (with justification for selection) or build a bot to meet the proposed project needs. All decisions about AI autonomy and human collaboration with AI will be defined and justified.

Letter grade.

Prerequisite(s): AIG 2001 and AIG 2002
