APPLIED HEALTH SCIENCE, B.S.

Program Learning Outcomes

All Applied Health Science majors will be able to:

- 1. Speak and write effectively to a target audience on essential information in health care.
- 2. Critically evaluate and integrate new information into professional practice to solve relevant health care concerns.
- Describe the mechanisms (i.e. metabolic, physiologic, biomechanical, and developmental) by which physical activity aids in health care settings.
- 4. Demonstrate preparedness to serve others in various health care settings through their selected vocation or calling.
