

SUSTAINABILITY STUDIES MINOR

This Sustainability Studies minor is an interdisciplinary program designed to help students develop a broad perspective on the issues and challenges of creation care and to acquire skills and tools for personally and collectively addressing those challenges. As an interdisciplinary minor, Sustainability Studies, connects expertise in the sciences, humanities, theology, and business as well as requires a sustainability practicum or internship experience. All of the courses in the minor will significantly address sustainability issues from the perspective of their respective disciplines.
